

100 kwh solar commercial building for sale

Where can a 100 kW solar system be used?

Supermarkets and shopping malls: Supporting refrigeration, lighting, escalators, and point-of-sale systems. Manufacturing facilities: Powering machinery, lighting, and ventilation systems. Maximize your solar investment with a 100kW system. Enjoy significant energy savings, reduce reliance on the grid and keep everything running.

How can a 100kW Solar System help your business?

A 100kW solar system can make your business completely independent from electric companies and their policies, or at least sufficiently lower your bills. In this section of our website you can check out our complete systems of different designs. 1. Solar system significantly lowers electric bills of your enterprise or eliminates them completely.

How much does a 100 kW solar system cost?

Buy the lowest cost 100 kW solar kit priced from \$0.95 to \$1.25 per watt with the latest, most powerful solar panels, module optimizers, or micro-inverters. For home or business, save 26% with a solar tax credit. SunWatts has a big selection of affordable 100 kW PV systems for sale.

What can a 100kW Solar System power?

A 100kW solar system is ideal for large commercial buildings with substantial energy consumption. It can power: Large office buildings and farms: Covering extensive lighting, HVAC systems, elevators, and IT infrastructure. Supermarkets and shopping malls: Supporting refrigeration, lighting, escalators, and point-of-sale systems.

What size solar panels do you need for a 100kW Solar System?

Generally, commercial systems are made with 72/144-cell, 96-cell panels or larger. The 100kW solar system size thus will depend on the panels that you'll choose. Consider purchasing bifacial panels if space is an issue: a bifacial module has an active backside that generates energy by using sunlight that was reflected from the ground.

Can a 100kW Solar System be paired with batteries?

However, you can also pair your 100kW solar system with batteries to build a hybrid or an off-grid system: while these are more expensive options, this will give your system more sustainability. Having batteries makes your installation more independent: for example, you can avoid peak utility rates.
