

# 175k kwh per month needed solar panels

How many solar panels do I Need?

Calculating how many solar panels you need can be done in four simple steps, which we outline below. Step 1: Find your monthly electricity usage in kilowatt-hours (kWh). You can find this at the bottom of your electricity bill. The average home's energy usage is about 900 kWh per month, according to the U.S. Energy Information Administration.

What is a solar panel size estimate calculator?

The Solar Panel Size Estimator Calculator is your go-to resource when planning a solar installation. It is crucial when you're assessing the feasibility of solar energy for your home or business.

How much energy does a solar panel produce?

A solar panel's wattage has the biggest impact on how much energy it produces. An average 400-watt monocrystalline solar panel will produce 2 kWh of energy per day. Solar panels with higher efficiency ratings will generally have higher wattages and are best for homes with limited roof space.

How to choose a solar panel efficiency rate?

Choose a panel efficiency rate based on available products, usually between 15% and 20%. Apply the formula:  $\text{Total Panel Area} = (\text{Energy Consumption} / (\text{Sunlight Hours} * \text{Panel Efficiency} * 0.75))$ . Example 1: Monthly usage of 800 kWh, 6 sunlight hours, 15% panel efficiency. Example 2: Monthly usage of 1000 kWh, 4 sunlight hours, 20% panel efficiency.

How much solar should I get?

Remember, you decide how much solar to get based on the need, available space, and budget. There is no rule that you have to offset 100% of current energy use. Utilities will generally allow grid-connected systems up to 120% of the previous 12 months consumption.

How much power does a solar system produce?

GoGreenSolar offers high-performance solar panels that deliver power output between 335 to 405 watts. The size of the solar system you can afford is often determined by your budget. Solar panels are just one part of the equation, and we have solar kits to match your specific energy needs, whether you want to offset your energy bill partially or completely.
