

18000 kwh solar system

How much does an 18kW Solar System cost?

The typical cost for an 18kW solar system is around \$36,000. However, it's important to note that prices have come down substantially over the past 10 years, making solar systems more affordable and accessible for homeowners and businesses. Source: The National Renewable Energy Laboratory (NREL)

How many kWh does an 18 kW solar system produce?

(Load Per Day) An 18 kW solar system typically produces an output of 90 kWh per day. However, it's important to note that the actual production depends on several factors, such as the amount of sunlight the panels receive. To achieve optimal output, the panels should receive a minimum of 5 hours of direct sunlight each day.

What is a 18kW split phase solar system?

With 18kw split phase (120/240V) output, it is more than powerful enough to run everything from air conditioners and well pumps to lights, fridge, tv, workshop, office and even light commercial and industrial applications. It is a much more affordable price and easily expandable, you can always add more batteries and more solar panels in the future.

What are the benefits of an 18kW Solar System?

One of the benefits of an 18kW solar system is the opportunity to generate a profit. If your system generates more electricity than you consume, you can sell the excess back to the grid. This allows you to earn money from your solar panels. Based on current electricity costs, you can expect a 20% return on your investment per year.

How many solar panels do I Need?

To achieve an 18kW solar system, most panels available on the market are 300 watts each. Therefore, you would need to install 60 or more panels to reach the desired capacity. If you need different power requirements, check out 15 kW solar systems

How much does a solar system cost?

Based on current electricity costs, you can expect a 20% return on your investment per year. The typical cost for an 18kW solar system is around \$36,000. However, it's important to note that prices have come down substantially over the past 10 years, making solar systems more affordable and accessible for homeowners and businesses.
