What is the 2020 fcny AHJ resource?

This resource will emphasize critical regulations and authority given to AHJs under the 2020 FCNYS, which is the current regulatory framework for stationary energy storage systems. Stay up to date on the latest clean energy siting resources and best practices for local government officials.

Where will stationary energy storage be available in 2030?

The largest markets for stationary energy storage in 2030 are projected to be in North America(41.1 GWh),China (32.6 GWh),and Europe (31.2 GWh). Excluding China,Japan (2.3 GWh) and South Korea (1.2 GWh) comprise a large part of the rest of the Asian market.

What percentage of Yemen's children live in hard-to-reach areas?

A school student during a class at one of the schools rehabilitated by local authorities in Aden with support from the SIERY Project. School-aged children in Yemen represent nearly 33 percent of the population. Over two-thirdsof them live in hard-to-reach areas.

What is the energy storage Grand Challenge?

This report, supported by the U.S. Department of Energy's Energy Storage Grand Challenge, summarizes current status and market projections for the global deployment of selected energy storage technologies in the transportation and stationary markets.

Where can I find information about energy storage regulations in New York City?

Updates and resources can be found on the Working Group's webpage. You can download NYSERDA's New York City [PDF]factsheet to learn more about energy storage regulations in New York City. The Trainings for Local Governments page offers additional resources including recordings and materials from NYSERDA's battery energy storage system trainings.

What is the growth rate of stationary storage in 2030?

By 2030,annual global deployments of stationary storage (excluding PSH) is projected to exceed 300 GWh,representing a 27%compound annual growth rate (CAGR) for grid-related storage and an 8% CAGR for use in industrial applications such as warehouse logistics and data centers.
