

2022 energy storage development

What is the 2022 biennial energy storage review?

The 2022 Biennial Energy Storage Review serves the purpose defined in EISA Section 641(e)(5) and presents the Subcommittee's and EAC's findings and recommendations for DOE.

Are there future opportunities for storage within the electricity sector?

In this study, we limit our focus to future opportunities for storage within the electricity sector. That is, we include only storage that takes in electrical energy, stores that energy in a variety of forms, and then returns the stored energy to the electricity system as electricity.

Which energy storage technologies are included in the 2020 cost and performance assessment?

The 2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, pumped storage hydro, compressed-air energy storage, and hydrogen energy storage.

What is the future of energy storage?

Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, driven by battery energy storage systems (BESS). Last year saw a record-breaking 200 gigawatt-hours (GWh) of new BESS projects coming online, a growth rate of 80%.

What is the future of energy storage integration?

166MIT Study on the Future of Energy Storage integration, by contrast, are expected to account for only a very small share (approximately 0.5%) of hydrogen demand. Increased demand for "green" hydrogen will drive down the cost of green hydrogen production technologies, eventually making power generation via hydrogen more cost competitive.

Is DOE addressing the energy storage industry's challenges?

EAC conducted a months-long review of obstacles and challenges facing the energy storage industry to determine areas of pressure and pain, and to assess whether DOE was addressing these obstacles and challenges in its funding, policy, initiatives, and other efforts.
