

8 solar vent fan with battery

What is a solar powered exhaust fan?

Transform your space with the 8 in. Solar Powered Exhaust Fan, designed to provide efficient ventilation without relying on your home's electricity. This fan operates entirely on solar power, absorbing sunlight through its panels to deliver a powerful airflow of 220CFM, making it perfect for spaces up to 2190 ft².

Where can a solar exhaust fan be installed?

Versatile and reliable, this exhaust fan can be mounted in windows or walls, making it suitable for a variety of settings, including barns, garden sheds, garages, animal houses, camping, and caravans. Experience the benefits of solar-powered ventilation and enjoy a cooler, fresher environment with this high-performance solar fan.

How does a solar fan work?

This fan operates entirely on solar power, absorbing sunlight through its panels to deliver a powerful airflow of 220CFM, making it perfect for spaces up to 2190 ft². Whether you need ventilation for a greenhouse, chicken coop, shed, or attic, this fan has you covered.
