

# A complete list of discounts for energy storage companies

Where can I find information about energy storage incentives?

Incentive details will be available on the Residential Energy Storage Incentive Dashboard and Retail Energy Storage Incentive Dashboard. The Residential Energy Storage Incentives are available for contractors' installing storage on a new or existing home in New York State. Incentives are available for up to 25 kWh of storage capacity.

What are residential energy storage incentives?

The Residential Energy Storage Incentives are available for contractors' installing storage on a new or existing home in New York State. Incentives are available for up to 25 kWh of storage capacity. The Program Manual [PDF] provides a full list of project eligibility and requirements.

Are battery storage projects eligible for energy storage incentives?

The Program Manual [PDF] provides a full list of project eligibility and requirements. For battery storage systems above five MW of AC power, projects could be eligible for incentives through the Bulk Energy Storage Program. Additional details on both the Residential and Retail Energy Storage Incentive are available in the program manual [PDF].

What are energy storage companies?

It encompasses various companies that offer a range of products and services to meet the increasing demand for energy storage solutions. These companies specialize in providing batteries, chargers, and energy storage systems for numerous applications, including telecommunications, renewable energy, and industrial sectors.

What are NYSERDA energy storage incentives?

NYSERDA's Residential and Retail Energy Storage Incentives are structured as fixed-rate incentives based on the storage systems capacity, measured in kilowatt hours (kWh). These incentives are available on a first-come, first-served basis.

How do I apply for a retail energy storage incentive?

Contractors and Builders can apply for this program separately through the NYSERDA Portal. The Retail Energy Storage Incentives are available for new commercial scale distributed (retail) energy storage projects up to 5 megawatts (MW) that are either located behind a customer's electric meter or interconnected directly to the distribution network.
