

All solid state lithium battery

The all-solid-state lithium-ion battery has a structure in which a positive electrode layer, a solid electrolyte layer, and a negative electrode layer are laminated. The solid electrolyte also fulfills the role of a separator that only allows the ...

Solid-state lithium-ion batteries are gaining attention as a promising alternative to traditional lithium-ion batteries. By utilizing a solid electrolyte instead of a liquid, these batteries offer the potential for enhanced safety, higher energy density, ...
