

Amazon battery solar small fan white

How long does a solar fan last?

With its rechargeable 10000mAh lithium battery, it can run for 8 to 30 hours at four different fan speeds. In 5-8 hours, the solar panel effectively charges the battery using monocrystalline silicon solar cells. The fan also doubles as a three-level LED night light, making it ideal for a variety of tasks including sleeping or reading.

How does a solar fan work?

The fan also doubles as a three-level LED night light, making it ideal for a variety of tasks including sleeping or reading. Featuring a solar panel and an integrated battery for continuous cooling in any location. Both charging and utilizing can be done simultaneously with solar electricity.

Can you use solar power on a camping fan?

Both charging and utilizing can be done simultaneously with solar electricity. Ideal for off-grid activities like hurricanes, power outages, and relaxing on a balcony, among other things. This small, light camping fan is ideal for people who lead busy lives because it is easy to fold up for storage or transportation.
