

Analysis of energy storage industry growth forecasting methods

How big is the energy storage industry?

Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period. The size of the energy storage industry in the U.S. will be driven by rising electrical applications and the adoption of rigorous energy efficiency standards.

What is the energy storage systems industry?

The energy storage systems industry by technology is segmented into pumped hydro, electro-chemical, electro-mechanical, and thermal. The energy storage systems reached USD 433 billion, USD 535.8 billion and USD 668.7 billion in 2022, 2023 and 2024 respectively.

What is the future of energy storage?

Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, driven by battery energy storage systems (BESS). Last year saw a record-breaking 200 gigawatt-hours (GWh) of new BESS projects coming online, a growth rate of 80%.

How much money did energy storage systems make in 2022?

The energy storage systems reached USD 433 billion, USD 535.8 billion and USD 668.7 billion in 2022, 2023 and 2024 respectively. The pumped hydro technology battery uses excess electricity to pump water from lower to upper reservoir.

Why is the energy storage industry growing?

The U.S. energy storage industry has been observing remarkable growth due to increasing demand for efficient battery storage from different sectors such as EV, renewable energy and many more. This is pushing numerous innovative initiatives in the industry. Solid-state batteries, gravity-based ESS are some of the innovations in the field.

How has cost decline impacted energy storage?

This trend may highlight that the cost decline over the past few years has driven energy storage into an era of accelerated diversification in the global market. The European energy storage market added 19.1 GWh of installed capacity in 2024, up 12.4% YoY, with drastic changes in the ESS landscape throughout the year.
