

Application for power storage testing qualification

Who can benefit from energy storage testing & certification services?

We provide a range of energy storage testing and certification services. These services benefit end users, such as electrical utility companies and commercial businesses, producers of energy storage systems, and supply chain companies that provide components and systems, such as inverters, solar panels, and batteries, to producers.

Where can I find performance and testing protocols for stationary energy storage systems?

The United States has several sources for performance and testing protocols on stationary energy storage systems. This research focuses on the protocols established by National Labs (Sandia National Laboratories and PNNL being two key labs in this area) and the Institute of Electrical and Electronics Engineers (IEEE).

What are some useful reports about energy storage testing?

Below is a non-exhaustive list of valuable reports that the working group has relied on when becoming familiar with storage testing. "Electric energy storage - future storage demand" by International Energy Agency (IEA) Annex ECES 26, 2015, C. Doetsch, B. Droste-Franke, G. Mulder, Y. Scholz, M. Perrin.

Can a stationary energy storage system adapt to other energy storage systems?

In regions where there is an absence of extensive or relevant protocols for stationary energy storage systems, there may be the ability to adapt or expand on protocols for other energy storage systems that are available.

What are the applications of energy storage systems?

Peak Shaving: Another important application is peak shaving, where the energy storage system is discharged during an "on-peak" period and charged during an "off-peak" period. **Voltage Support:** This is also important and is where the power is used to maintain the voltage within specified limits.

Are energy storage systems reliable and efficient?

Energy storage systems are reliable and efficient, and they can be tailored to custom solutions for a company's specific needs. **Benefits of energy storage system testing and certification:** We have extensive testing and certification experience.
