

Aps solar battery rebate

What is the APS Rebate program?

To receive the rebate, APS customers must agree to share their battery's data. Additional payments are available to those who agree to let APS dispatch their battery's power during peak demand hours. SolarEdge is one of the two partner brands currently accepted in the program.

Does APS offer a rebate for solar water heaters?

APS offers customers an instant rebate for the full installed price of solar water heaters. Customers will own these water heaters and the units will heat a home's water when excess solar generation is available, saving money over the lifetime of the unit.

How long does it take to enroll in solar incentives?

For both incentives, enrollment is a three-year commitment. Participants must be on a Time-of-Use (TOU) or grandfathered service plan with a solar rate rider and must also be connecting their battery to the grid for the first time. Customers with existing batteries are not eligible to enroll.
