

# Are solar car battery chargers any good

Do solar battery car chargers work?

As long as you are using a solar battery car charger for the intended use, yes, they work. Solar battery chargers do not typically have multiple amperage settings, which means that they only provide a small amount of current to the battery.

What is the difference between a solar car battery charger & regular Charger?

Besides the obvious difference of the power source, the main difference between a solar car battery charger and a regular charger are that standard chargers are more commonly used to fully charge a dead battery.

Can a solar car battery charger charge a dead battery?

A solar car battery charger will not be able to charge a completely dead battery. They are not for this purpose. Solar-powered car battery chargers are trickle chargers, meaning they charge at a rate that's equal to the self-discharge rate. This enables batteries to remain fully charged at the proper level.

Which solar charger should I buy?

The PV Logic is easy to use and store and performed well at a reasonable price. For use outside the car, the Photonic Universe 10W would be our choice, with the Topsolar panel close behind. Solar chargers are incredibly useful but should the worst happen then you will need a jump starter pack.

Should you buy a solar-powered trickle charger?

One of the main benefits of buying a solar-powered trickle charger is not needing electricity from the grid to charge the battery. Anywhere there is sunlight, a solar trickle charger will maintain the battery with an even charge. The way solar battery chargers work is they have solar panels that convert sunlight into electrical current.

Which solar charger should I use outside my car?

For use outside the car, the Photonic Universe 10W would be our choice, with the Topsolar panel close behind. Solar chargers are incredibly useful but should the worst happen then you will need a jump starter pack. [Click here to discover the best car jump starter packs...](#)

Second, consider the efficiency of the solar charger. The higher the efficiency, the faster your car's battery will charge. The best way to ensure good efficiency is by checking the reviews of the solar charger before purchasing it. Or, if you know ...
