

# Average BESS price per 10kW in Cyprus

How much does electricity cost in Cyprus?

The average price of electricity since 2007 reached its maximum, EUR0.3739kWh, in December of 2023 and its minimum price, EUR0.1527 kWh, in June of 2016. The difference between the price of electricity with and without taxes is EUR 0.1427 tax for each kilowatt hour, thus, 38.17% of what households pay for electricity in Cyprus.

How much does a Bess battery cost?

Factoring in these costs from the beginning ensures there are no unexpected expenses when the battery reaches the end of its useful life. To better understand BESS costs, it's useful to look at the cost per kilowatt-hour (kWh) stored. As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown:

What factors affect the cost of a Bess system?

Several factors can influence the cost of a BESS, including: Larger systems cost more, but they often provide better value per kWh due to economies of scale. For instance, utility-scale projects benefit from bulk purchasing and reduced per-unit costs compared to residential installations. Costs can vary depending on where the system is installed.

Figure 3 shows the resulting utility-scale BESS future cost projections for the Moderate Scenario for 2-10 hours in terms of both \$/kWh and \$/kW. For the Advanced and Conservative BESS cost scenarios, we apply the normalized ...

Base year costs for utility-scale battery energy storage systems (BESS) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2022). The bottom-up BESS model accounts for ...
