Can energy storage systems be deployed in Indonesia?

Tapping into the limited but existing opportunities for deploying energy storage systems (ESS) is vital for expanding their role in Indonesia's power sector. At present, the greatest potential for ESS deployment lies in smaller and/or isolated systems, as well as in industrial or large scale commercial solar rooftop PV with BESS.

Why do ESS installation costs vary across countries?

Variations in ESS installation costs across countries are driven by factors such as project size, labour costs, and the availability of a strong technology supply chain. China currently leads in this area due to relatively low soft costs and advanced hardware manufacturing, particularly in lithium iron phosphate (LFP)-based LIB cells.
