

# Average LFP battery system price per 30MW in Switzerland

How much does a LFP cell cost?

The price of LFP cells is over 20% lower than nickel cobalt manganese (NCM) cells. The average price of an LFP cell was just under \$60/kWh in 2024. Currently, Greater China has a near monopoly in LFP cell manufacturing, considering the negligible LFP production capacity in Europe and North America.

Will LFP increase the global average price of LFP cells?

The addition of LFP capacities outside of Greater China will raise the global average price of LFP cells in the midterm, but as the manufacturing cost is brought under control through process improvements, the global LFP average cell price will gradually fall below the current level.

How much does an LFP cell cost in 2024?

The average price of an LFP cell was just under \$60/kWh in 2024. Currently, Greater China has a near monopoly in LFP cell manufacturing, considering the negligible LFP production capacity in Europe and North America. However, LFP production capacity is poised to expand, especially in Europe, through this decade.

Where does LFP spot price come from?

LFP spot price comes from the ICC Battery price database, where spot price is based on reported quotes from companies, battery cell prices could be even lower if batteries are purchased in high volume. Estimated cell manufacturing cost uses the BNEF BattMan Cost Model, adjusting LFP cathode prices with ICC cathode spot prices.

Are LFP batteries more expensive than NMC batteries?

Despite the price growth of lithium outpacing other minerals, LFP batteries remain more affordable compared to Nickel Manganese Cobalt (NMC) batteries. In 2023, the price difference narrowed, with NMC batteries being less than 25% more expensive than their LFP counterparts, down from a 50% premium in 2021.

How much does a lithium battery cost in China?

Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China. Regionally, the average prices of lithium battery packs were lower in China, at \$94 per kWh, while prices in the U.S. and Europe were 31% and 48% higher, respectively.
