

Average NMC battery storage price per 8MW in Argentina

How much does nmc111 battery cost?

NMC111 with equal shares of nickel, manganese and cobalt assumed here. Battery pack price of 130 USD/kWh assumed. Values in brackets show baseline raw material cost assumptions based on monthly average prices from 2010-2020.

Does raw material cost affect lithium-ion battery pack prices?

The analysis shows that each material only contributes a minor share to total raw material cost. In addition, total raw materials cost only constitute a share of total product price. The cost increase of one raw material will therefore only have a limited impact on lithium-ion battery pack prices.

Which storage technology has the lowest material cost?

Mechanical storage technologies have the lowest material cost below 20 USD/kWh due to the low-cost materials employed. Figure 1 - Raw material cost for common electricity storage technologies. Error bars account for variations in each technology's raw material inventory and commodity prices from 2010-2020.

What is the difference between LFP and NMC battery pack prices?

LFP battery pack prices are most sensitive to copper, aluminium and lithium hydroxide cost. A quadrupling of all three would increase pack prices by ~35%. In contrast, NMC battery pack prices are most sensitive to the cathode materials, nickel and cobalt. A quadrupling of the cost for both would increase NMC battery pack prices by more than 50%.

Would a quadrupling of copper prices increase LFP & NMC pack prices?

A quadrupling of copper prices, i.e. 300% cost increase, would increase LFP or NMC pack prices by 16.2% or 15.1% respectively. LFP battery pack prices are most sensitive to copper, aluminium and lithium hydroxide cost. A quadrupling of all three would increase pack prices by ~35%.

Discover the comprehensive breakdown of 1 MW battery storage cost, ranging from \$600,000 to \$900,000. Learn how Maxbo's tailored energy solutions cater to Europe's energy demands, ensuring cost-efficiency and sustainability. Explore ...

The battery storage technologies do not calculate LCOE or LCOS, so do not use financial assumptions. Therefore all parameters are the same for the R&D and Markets & Policies Financials cases. The 2023 ATB represents cost and ...
