

Average VRFB energy storage price per 8MW in Spain

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

How do Renewable Project revenues work in Spain?

So in Spain, more than anywhere else in Europe, renewable project revenues no longer depend exclusively on the produced volumes of electricity, but also on how these volumes are liquidated on power markets. No wonder long-term trends regarding market prices are considered a major concern and subject to many dedicated forecasting services in Iberia.

Does Spain have a storage market?

Currently, Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition, Spain's reliance on fossil gas has increased price volatility in recent years.^{16,17,18,19}

Is combining solar and storage a good idea in Spain?

This variability, combined with Spain's excellent solar resources, make the economics of combining solar with storage increasingly favorable. The market for utility-scale batteries has been almost non-existent until recently as the market has lacked a clear policy and regulatory framework.

Will Spain achieve 20GW of storage by 2030?

In addition, Spain has developed a national storage roadmap that includes a target to achieve 20GW of storage by 2030. However, current levels of customer-sited storage adoption already exceed its 2030 targets.³⁷ To date, neither has been sufficiently attractive to mobilize investments at scale.

4 · Source: Red Eléctrica de España. Average daily price: Arithmetic mean of the day's prices for the PVPC tariff. Price in euros per kilowatt-hour. Reference prices for mainland Spain and the Balearic Islands; does not include ...

Our Member Largo has deployed a 6.1 MWh Vanadium Redox Flow Battery for Enel Green Power España, located in Mallorca, Spain. Largo Clean Energy (LCE) entered into its first VCHARGE VRFB
