

Average business energy storage price per 30kWh in Turkey

How much does Turkey spend on energy?

Currently, Turkey spends more than \$50 billion annually on imported oil, natural gas, and coal, in place of using its indigenous energy resources. Turkey prioritizes renewable energy over thermal power plants in its clean energy transition. The Turkish government has plans to integrate nuclear energy as part of its energy mix.

Is Turkey a regulated electricity market?

Turkey has a semi-liberalized and moderately regulated market. Energy Exchange Istanbul (EXIST) is Turkey's electricity spot market, which manages day-ahead and intraday markets where 40% of electricity is traded among 854 market participants. EXIST's website features electricity prices in real time.

How much energy does Turkey have?

Turkey currently has approximately 31.6 GW of hydroelectric, 25.75 GW of natural gas (NG), 21.3 GW of coal, 11.45 GW of wind, 9.93 GW of solar, 1.7 GW of geothermal, and approximately 2 GW of biomass power plant installed capacity.

How much power will Turkey have in 2035?

According to Turkey's 2020-2035 National Energy Plan, Turkey's power generation capacity will reach 189.7 GW in 2035 (a 79% increase from 2023). Turkey's share of renewable energy will increase to 64.7% with solar power capacity increasing 432% and wind capacity increasing 158%.

Can a roof-top solar energy producer sell excess electricity?

Roof-top solar energy producers can sell their excess electricity to the grid at a maximum limit of 5 MW if they are production plant owners, and 10 kW if they are homeowners. Solar and wind energy investments receive customs duty exemptions, corporate tax deduction, and other incentives.
