

Average commercial energy storage price per 10kW in Estonia

What data does Statistics Estonia collect?

To produce energy statistics, Statistics Estonia collects the following data: stocks of energy products, imports and exports. In Estonia, a large share of energy is still produced from non-renewable resources such as oil shale.

How much does electricity cost per kilowatt-hour?

For example, if the wholesale price of electricity is EUR 43 per megawatt-hour, that would be 4.3 cents per kilowatt-hour in kilowatts. It is worth remembering that the wholesale price of electricity does not include VAT and does not take into account the customer's electricity consumption.

What is Eesti Energia doing in 2021?

Eesti Energia dominates the power sector with 85% of generation, over 95% of distribution, and around 50% of total sales. The share of oil shale in the power mix was reduced from 88% in 2010 to 46% in 2023. Gas prices more than doubled in 2021 and 2022 and have decreased significantly since then.

The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development ...

Current costs for commercial and industrial BESS are based on NREL's bottom-up BESS cost model using the data and methodology of (Feldman et al., 2021), who estimated costs for a 600-kW DC stand-alone BESS with 0.5-4.0 hours of ...
