

Average container energy storage price per 50kW in Romania

Are energy storage technologies commercially available in Romania?

This study investigated the feasibility of energy storage technologies that are commercially available on the Romanian market by using the levelized cost of storage (LCOS) method. The proposed approach also considers subsidies and different battery energy storage system' (BESS) technical parameters.

How much does electricity cost in Romania?

The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics. Thus, the LCOS values must be less or equal to the aforementioned threshold to be cost efficient and considered a profitable investment for the BESS's owner.

Can a battery be used in a PV system in Romania?

As the price for every kWh injected into the network and battery energy storage system (BESS) costs are dynamic, the household and industrial consumers who want to integrate a battery in their PV system may have difficulties choosing between the commercially batteries available on the Romanian market.

How much LCoS does a battery cost in Romania?

To be considered profitable, the LCOS of the battery must be less or equal to electricity unit price paid by the customer. The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics.

Are battery technologies profitable in Romania?

Profitability evaluation for 5 types of battery technologies in Romania. BESSs costs were obtained from Romanian market analysis. LCB technologies are the most feasible from the examined BESSs. A sensitivity analysis with respect to cost parameters is presented. The variation of capital expenditure has the highest influence on LCOS values.

Are there commercially available batteries on Romanian market?

The analysis presents the commercially available batteries on Romanian market, the technical performances of each battery, the costs involved in this decision, the opportunity to reduce their investment and indicates the most profitable battery obtained after LCOS method is performed.

Acest lucru a devenit din ce în ce mai evident, odata cu aparitia optiunilor de pachete tarifare per kilowatt oferite de furnizori. Prin aceste pachete, consumatorii pot alege variantele care li se potrivesc cel mai bine pentru ...
