

# Average cost per kwh solar denton texas

Is solar energy affordable in Denton Texas?

This renewable energy source is sustainable and affordable. And if you're in a sunny locale like Denton, Texas, there are many top solar companies to choose from to meet your needs and stay within budget. Denton's population is more than 148,139, but the city maintains a cost of living that's lower than the national average.

Does Denton pay more for solar?

Denton's population is more than 148,139, but the city maintains a cost of living that's lower than the national average. Accordingly, Denton residents typically pay more for local services. When it comes to solar installations, though, this may not be the case. Places with more sun tend to have a broader range of price options.

How much do solar panels cost in Texas?

Last updated: June 2025 As of 2025, the average cost of solar panels in Texas is \$2.84 per watt, making a typical 7.2 kilowatt (kW) solar system \$14,314 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States, which is currently \$3.03 per watt.

How much does a solar system cost?

This is lower than the average price of residential solar power systems across the United States, which is currently \$3.03 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

How much does solar cost per watt?

"Cost per watt" helps you compare the value of solar energy systems of different sizes. The average cost per watt is \$2.13. The federal solar investment tax credit is not a rebate or a refund, but it goes toward what you owe on federal income taxes. On average, homeowners with solar panels avoid \$85,512 in utility costs over 25 years.

How long do solar panels last in Texas?

Edward Hirs, an energy economics expert at the University of Houston, said solar panels work out for most people, noting that hot climates tend to come with good sunlight, especially in the southern parts of the state. In Texas, solar panels usually pay for themselves within 6.22 years.
