

Average domestic energy storage price per 15MW in Greece

Should Greece invest in energy storage facilities?

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in PVs, as well as PHS facilities .

How much does electricity cost in Greece?

All these components combined determine the final retail electricity price that end-users pay. Eurostat data (for 2022) showed Greek household electricity prices (excluding taxes) ranged roughly EUR0.34-EUR0.42/kWh depending on consumption band - among the higher in the EU, due to heavy reliance on imported gas at the time.

How long should energy storage be in a Greek power system?

Considering the energy arbitrage and flexibility needs of the Greek power system, a mix of short (~2 MWh/MW) and longer (>6 MWh/MW) duration storages has been identified as optimal. In the short run, storage is primarily needed for balancing services and to a smaller degree for limited energy arbitrage.

How will dynamic pricing affect Greece's electricity market?

As the energy landscape evolves (with more PV, wind, storage, and interconnections coming online), dynamic pricing is expected to play a crucial role in Greece's electricity market, providing both economic and grid stability benefits.

What is the tax on electricity in Greece?

Excise Tax: A small tax on electricity consumption (pursuant to EU Energy Tax Directive) - in Greece this is minimal for households (on the order of EUR0.0022/kWh in 2022, labeled as an "environmental" or "special consumption" tax).

How many storage plants are there in Greece?

Currently there are four(4) storage plants operating in Greece, two open-loop pumped-hydro storage (PHS) stations in the mainland (700 MW in total) and two small hybrid RES-storage stations in non-interconnected islands (just 3 MW).

Even though electricity storage is recognized as a prerequisite for the decarbonization of the power sector, the development of storage facilities is still facing legal/regulatory barriers and investment feasibility concerns. This article ...
