

Average domestic energy storage price per 30kW in Bulgaria

How much does electricity cost in Bulgaria?

The average price of electricity since 2007 reached its maximum, EUR0.1192kWh, in December of 2023 and its minimum price, EUR0.0711 kWh, in June of 2008. The difference between the price of electricity with and without taxes is EUR 0.0199 tax for each kilowatt hour, thus, 16.65% of what households pay for electricity in Bulgaria.

Why are electricity prices so high in Bulgaria?

Rising costs for fossil fuels and CO₂ emissions are already pushing electricity prices in Bulgaria to record high levels. In response, businesses are turning to renewable energy to lower their electricity bills.

How is the Bulgarian electricity market regulated?

The Bulgarian electricity market is regulated by national laws and policies, which align with European Union directives and regulations. Efforts have been made to liberalize the market, allowing for greater competition and private sector involvement, which is expected to lead to more competitive pricing and improved service quality.

Why is solar power growing in Bulgaria?

Solar power, in particular, has witnessed significant growth, with numerous solar parks being developed across the country. This shift is in line with global trends and Bulgaria's commitment to reducing carbon emissions and embracing sustainable energy practices. Bulgaria is an active participant in the European Union's electricity market.
