

Average enterprise ESS system price per 15MW in Indonesia

Does Indonesia have a large-scale energy storage system?

His Muhammad Bintang, Author of Powering the Future 2024 and Coordinator of IESR's Energy and Electricity Resources Research Group, said that Indonesia does not yet have a large-scale energy storage system. "The electricity export scheme to Singapore could be an opportunity to accelerate the country's adoption of ESS.

How can Bess help the EV market in Indonesia?

The growing EV market will necessitate a robust battery ecosystem, including storage solutions for grid integration and charging infrastructure. Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving.

Can energy storage systems be deployed in Indonesia?

Tapping into the limited but existing opportunities for deploying energy storage systems (ESS) is vital for expanding their role in Indonesia's power sector. At present, the greatest potential for ESS deployment lies in smaller and/or isolated systems, as well as in industrial or large scale commercial solar rooftop PV with BESS.

Can Singapore accelerate ESS development in Indonesia?

"The electricity export scheme to Singapore could be an opportunity to accelerate the country's adoption of ESS. With this project, energy storage capacity could increase to 33.7 GWH by 2030," he said. IESR recommends several important steps for the government to accelerate ESS development in Indonesia.

Why do ESS installation costs vary across countries?

Variations in ESS installation costs across countries are driven by factors such as project size, labour costs, and the availability of a strong technology supply chain. China currently leads in this area due to relatively low soft costs and advanced hardware manufacturing, particularly in lithium iron phosphate (LFP)-based LIB cells.

Why do Indonesians need energy storage?

Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving. The Indonesian government recognizes the importance of energy storage.
