

Average enterprise ESS system price per 250MW in Vietnam

Is Vietnam a good market for energy storage solutions?

Vietnam represents a promising market for German and European small and medium-sized enterprises (SMEs) specialising in energy storage solutions, thanks to their technical expertise and established reputation in RE technologies.

How a Bess project is promoting energy storage in Vietnam?

Encouraging domestic enterprises to invest in new technologies will promote the growth of the energy storage industry in Vietnam. Investment in BESS projects in Vietnam is attracting the attention of international partners due to the country's strong potential for RE development.

Does Vietnam have a Bess market?

Currently, the BESS market in Vietnam is nascent, with significant limitations in terms of technical expertise and infrastructure. As at November 2024, Vietnam had only three pilot BESS projects: one at Power Engineering Consulting Joint Stock Company 2 (PECC2), another at VinFast and a third at Kehua Digital Energy in Khanh Hoa.

How many MW will Vietnam's storage batteries be able to run?

The plan expects storage batteries to reach a capacity of 300 MW by 2030, accounting for 0.2% of Vietnam's total electricity capacity. However, the policy framework for BESSs in Vietnam is still being refined and will continue to be adjusted to align with the country's economic and environmental development goals.

Why do businesses need a Bess system in Vietnam?

BESSs not only enable businesses to store surplus energy during low-demand periods but also alleviate pressure on the grid during peak hours, optimising operating costs. Currently, the BESS market in Vietnam is nascent, with significant limitations in terms of technical expertise and infrastructure.

Is Vietnam accelerating the development of re and Bess?

A detailed BESS analysis shows that Vietnam is accelerating the development of RE combined with BESSs to optimise energy use and ensure the stability of the power grid. The government has issued policies to encourage BESS deployment, as outlined in the PDP VIII, with the goal of developing a storage capacity of 300 MW by 2030.
