

Average grid tied storage system price per 150MW in Romania

How much solar energy is injected into the grid in Romania?

As shown in Fig. 1, the share of RES in the total amount of electricity injected into the grid by the dispatchable producers increased from 35.4 % in 2013 to 44.39 % in 2020. Fig. 1. Romania electricity mix . In 2019 the Romanian Parliament adopted the prosumer law to encourage the increase of solar electricity injected into the grid.

How much does a grid connection cost?

The complexity of grid connection requirements varies significantly based on location and local regulations, with costs ranging from EUR50,000 to EUR200,000 per MW of capacity. System integration expenses cover the sophisticated control systems, energy management software, and monitoring equipment essential for optimal battery performance.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

Are battery technologies profitable in Romania?

Profitability evaluation for 5 types of battery technologies in Romania. BESSs costs were obtained from Romanian market analysis. LCB technologies are the most feasible from the examined BESSs. A sensitivity analysis with respect to cost parameters is presented. The variation of capital expenditure has the highest influence on LCOS values.

How much does electricity cost in Romania?

The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics . Thus, the LCOS values must be less or equal to the aforementioned threshold to be cost efficient and considered a profitable investment for the BESS's owner.

How much LCoS does a battery cost in Romania?

To be considered profitable, the LCOS of the battery must be less or equal to electricity unit price paid by the customer. The electricity price considered for Romania is 0.1734 EUR/kWh, which is the average price in the first quarter of 2021, according to EU statistics .
