

Average grid tied storage system price per 200MW in Greece

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

How many MW is a battery energy storage system?

It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions. In the latest bidding, nine projects with a four-hour storage duration have been selected for a total capacity of 188.9 MW.

How much does a mw subsidy cost in Macedonia?

The average subsidy price in the third auction exercise came at EUR52589.16/MW/year. The lowest successful bid stood at EUR43927/MW/year, concerning a 25 MW/100 MWh project in the Western Macedonia region. The highest awarded subsidy came at EUR58773/MW/year and refers to a 7.9 MW/31.6 MWh project located in the same region.

Where will lignite facilities be installed in Greece?

The facilities will be installed in the Western Macedonia region in northern Greece and in the municipalities of Megalopolis, Tripoli, Gortynia and Oichalia in the Peloponnese region. They are the country's lignite regions, covered by the Just Transition Development Plan.

Does Greece have a Bess subsidy program?

Moving forward, Greece is abandoning subsidizing BESS via auctions. Instead, the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support.
