

Average hybrid renewable storage price per 800kW in Burundi

How much does electricity cost in Burundi?

Average power prices in Burundi are among the most expensive in the world, some sources citing the average tariff at USD 0.31/kWh ("REGIDESO to Nearly Triple Electricity Tariffs" 2017).

How much solar power is available in Burundi?

Hydropower: 1,700 MW of potential. 300 MW are economically possible ("Burundi" 2022). Solar: Average daily solar insolation is 4-5 kWh/m²/day, indicating strong solar potential for Burundi ("Energy Profile Burundi" n.d.). There is a growing number of households, businesses, schools, and health clinics using distributed, off-grid solar.

What is the primary energy supply in Burundi?

The remainder of the primary energy supply is from oil ("Burundi Energy Profile" 2021). However, a majority (98%) of the renewable energy supply in Burundi is bioenergy. The remainder of the renewable energy supply is hydroelectric, and solar power ("Burundi Energy Profile" 2021).

Which region of Burundi has a high potential for wind energy harvesting?

Another study found that the Bujumbura region has a high potential for wind energy harvesting (Placide, Lollchund, and Dalso 2021). Geothermal: According to the Burundi Ministry for Energy and Mines, the Rift Valley region of the country is likely to have geothermal potential (Manirakiza 2012).

What can a Burundi Energy Center do?

For example, such a center in Burundi could focus on funding and implementing solar-plus-storage technologies for rural and remote households. The 2015 Electricity Act enables foreign investments into the power sector. In addition, laws in Burundi allow tax benefits for energy investment and public-private partnership.

Why is firewood a major source of energy in Burundi?

Firewood is the main source of this energy, as well as for industrial activities ("Burundi" 2022). The demand for firewood is higher than production. In addition, the use of firewood has led to significant deforestation ("Burundi" 2022). Less than 3% of the total land area in Burundi is forested ("Burundi" n.d.).

The costs presented here (and for distributed commercial storage and utility-scale storage) are based on this work. This work incorporates current battery costs and breakdown from the Feldman 2021 report (Feldman et al., 2021) that works ...

The 2021 ATB represents cost and performance for battery storage across a range of durations (1-8 hours). It represents lithium-ion batteries only at this time. There are a variety of other commercial and emerging energy
