

Average hybrid solar storage price per 50MW in Bulgaria

How big is Bulgaria's solar power market?

This is a large market with rapidly increasing purchasing power. For the first time after a decade, a 58 MW new large-scale solar photovoltaic power plant of the Bulgarian company Real States was connected to the grid in April 2022, with the expectation to be increased to 150 MW.

How much solar power does Bulgaria have in 2022?

At the end of 2022, Bulgaria's cumulative installed solar PV capacity exceeded 1,700 MW (1.7 GW). Several large-scale solar photovoltaic (PV) projects with a power capacity above 50 MW were launched into commercial operation in Bulgaria in 2022. Local and international investors will build new solar projects between 2023 and 2025.

Why is the market for distributed solar PV growing in Bulgaria?

As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market is occurring despite the lack of a clear policy and regulatory framework, and in spite of the presence of many administrative and tax-related barriers.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11.700 MWh per year from grid electricity consumption (sufficient for approx. 12.000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

When will solar projects start in Bulgaria?

Several large-scale solar photovoltaic (PV) projects with a power capacity above 50 MW were launched into commercial operation in Bulgaria in 2022. Local and international investors will build new solar projects between 2023 and 2025. In the last few years, Bulgaria has been the focus of the investors' interest.

What should Bulgaria do about solar energy?

The authorities in Bulgaria need to take steps to systematically reduce barriers, fees, and surcharges on small and medium-sized solar PV systems, make it easier to connect to the grid and export the surplus electricity, and create a comprehensive policy and regulatory environment to catalyse investments.

1) Total battery energy storage project costs average €580k/MW 68% of battery project costs range between €400k/MW and €700k/MW. When exclusively considering two-hour sites the median of battery project costs are €650k/MW.
