

# Average hybrid solar storage price per 50kW in Australia

How much does a 50kWh solar battery cost in Australia?

Still, 50kWh is often a sweet middle ground that covers most use cases without overinvesting. As of 2025, prices for a 50kWh solar battery in Australia start from around A\$33,499, depending on the brand, battery chemistry (like LFP or NMC), and whether it's a modular or all-in-one unit. Prices can vary based on:

How much does a hybrid solar system cost?

The solar backup functionality adds to the cost of a hybrid system by anywhere between \$1,500 - \$3,500. It is possible to buy a battery ready system in preparation for the purchase of a battery in the short to medium-term. A battery ready system comes with a hybrid inverter so that a new battery can fit straight into the system at a later date.

Are hybrid solar inverters battery ready?

Hybrid solar inverters represent a true 'battery ready' inverter setup, as described in our article on the truth about battery ready systems. But you don't have to have a hybrid inverter for a battery system. Using a method called "AC coupling", you can retrofit batteries to any existing solar system regardless of what inverter you have.

How much does a solar battery cost?

A 6.6kW solar system with a 10kWh battery can cost anywhere between \$16,000 - \$21,000. Retrofit: Adding a battery to an existing solar system might require a new hybrid inverter if your current inverter isn't compatible. This can add an extra \$2,000-\$4,000 to the total cost of solar battery installation. 7.

How much does a 6.6kw Solar System cost?

As a guide, a 6.6kW panel system with a 10kWh battery will cost anywhere between \$16,000 - \$21,000. This table below compares the cost differences between the systems: Our solar calculator allows you to analyse the difference between hybrid systems and solar panels.

How much does a solar inverter cost?

New Hybrid System: If you're installing a new solar system with a battery, a hybrid inverter will be integrated from the start. This can be more cost-effective as it streamlines installation and component compatibility. A 6.6kW solar system with a 10kWh battery can cost anywhere between \$16,000 - \$21,000.

\* Solar battery cost per kWh On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh. Update: This tax is only available to home battery ...

Tesla provides a 10-year warranty on the battery. Tesla Powerwall 3 price The federal government solar
