

# Average industrial energy storage price per 100MW in Poland

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

How to start an energy storage facility in Poland?

When considering starting an investment as an energy storage facility, it is necessary to apply the Energy Law, which contains regulations for this type of installation. The main regulatory obligations in Poland depend on the total installed capacity of a given storage facility .

How do energy storage projects work in Poland?

The operational stage of a storage project also typically involves a process of support agreements such as O&M contracts, technical consulting, and power distributor agreements. Projects concerning energy storage, as with other infrastructure projects in Poland, require the necessary administrative permits to be obtained.

Should US companies offer battery energy storage systems in Poland?

U.S. Commercial Service recommends that U.S. companies offering battery energy storage systems take a hard look at the Polish market because there will be opportunities for U.S. companies to propose their solutions for many years to come. For more information, please contact Commercial Service Poland at [office.warsaw@trade.gov](mailto:office.warsaw@trade.gov).

How much does electricity cost in Poland in 2022?

In the second half of 2022, electricity prices for the industry in Poland exceeded 11.2 euros per kilowatt-hour. The energy intensity of enterprises in Poland is one of the higher in the European Union and much higher than in Western European countries. Companies are not able to compensate for rising energy prices in the prices of their products.

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Zarnowiec battery energy storage project, which will ...
