

Average industrial energy storage price per 300MW in Estonia

What data does Statistics Estonia collect?

To produce energy statistics, Statistics Estonia collects the following data: stocks of energy products, imports and exports. In Estonia, a large share of energy is still produced from non-renewable resources such as oil shale.

Who regulates the energy sector in Estonia?

The Estonian Competition Authority regulates the energy sector and reports to the Ministry of Economic Affairs and Communications. Four main operators are involved in the supply, trading, and logistics of oil: Alexela, Vopak EOS, Scantrans (Ireland) and Eurodek (Denmark).

What are energy storage technologies?

Informing the viable application of electricity storage technologies, including batteries and pumped hydro storage, with the latest data and analysis on costs and performance. Energy storage technologies store energy either as electricity or heat/cold, so it can be used at a later time.

How much Russian gas does EE import?

Including intra-EU trade. For the EU27 average, the total imports are based on extra-EU27 imports. While Eurostat 2020 data report a 46% import gas dependency on Russia for EE, accounting for the secondary dependence on Russian gas through intra-EU imports would lead to the estimation that EE has a 98% Russian i

What happened to battery energy storage systems in Germany?

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh.

What is Estonia doing in 2023?

Oil shale dominates the energy mix (57% in 2023), with 2/3 used in power generation and 1/3 used to produce fuel. The development of wind is the main priority, with a lot of offshore projects. After failing to reach an agreement with Finland, Estonia is developing several LNG terminal projects.

Future Projections: Future projections are based on the same literature review data that inform Cole and Frazier (Cole and Frazier, 2020), who generally used the median of published cost estimates to develop a Mid Technology Cost ...

The average annual price for the Estonian price zone of the Nord Pool electricity exchange in 2024 stood at EUR87.27 per megawatt-hour, a few euros lower than the average for 2023. However, the figure is still significantly higher ...
