

## Average lithium ion storage price per 30MW in Bolivia

Will Bolivia make lithium-ion batteries locally by 2025?

Bolivia's long-shot goal: to make lithium-ion batteries locally by 2025, an ambition even neighboring and more affluent Chile, the world's No. 2 lithium producer, has not achieved after decades of production.

How much lithium is produced in Bolivia?

Despite having such enormous untapped reserves, Bolivia currently is an afterthought when it comes to lithium production, at only 543 tons a year. This is compared to the present world leader, Australia, which now produces over 50% of world lithium at 55,000 tons per year.

How much does a lithium ion battery cost?

The electric vehicle market, the primary driver for lithium-ion batteries, grew more slowly than in previous years but still showed the lowest price at \$97 per kWh. Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China.

How much does a lithium battery cost in China?

Meanwhile, the stationary storage market has surged, with intense competition among cell and system suppliers, particularly in China. Regionally, the average prices of lithium battery packs were lower in China, at \$94 per kWh, while prices in the U.S. and Europe were 31% and 48% higher, respectively.

How much does a lithium battery cost in 2024?

In 2024, the average global prices of lithium-ion batteries dropped by 20%, reaching \$115 per kWh. For electric vehicle batteries, the price fell below \$100 per kWh. Why Are Lithium Battery Prices Falling?

By 2018, the Gigafactory will reach full capacity and produce more lithium ion batteries annually than were produced worldwide in 2013 [10]. While Tesla's Nevada factory may capture the headlines, China is likely to dominate lithium ...

The battery storage technologies do not calculate LCOE or LCOS, so do not use financial assumptions. Therefore all parameters are the same for the R& D and Markets & Policies Financials cases. The 2023 ATB represents cost and ...

It represents only lithium-ion batteries (LIBs)--those with nickel manganese cobalt (NMC) and lithium iron phosphate (LFP) chemistries--at this time, with LFP becoming the primary chemistry for stationary storage starting in 2021.
