

Average lithium ion storage price per 30MW in New Zealand

How much does a battery system cost?

Overall Costs: The average total price paid for a battery system is \$14,396, indicating that energy storage is still a significant investment for many. The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget.

How much does a battery cost per kWh?

Despite these limitations, here's what the small dataset revealed: Key Insights: Battery Cost Per kWh: The average price per kWh is \$1,249.79, which sets a benchmark for assessing battery affordability in the market (since we don't have much previous data on battery prices in NZ).

How much solar energy does a Kiwi home need?

An average Kiwi home needs over 20 kWh of energy per day, and usually half or more of it is used during the evenings and mornings. This makes a 10-15 kWh battery system suitable for most homes. You can check the size of battery that your home needs on our solar calculator.

How much does LTI cost?

Frequency Keeping in 2016. The reserve cost is assumed at approximately ~\$6/MWh in the North Island and ~\$12/MWh in the South Island. We based our assumption on the 2016 average of ~\$12/MWh in the North Island and ~\$14/MWh in the South Island. This service
