

Average lithium ion storage price per 8MW in Mexico

What are battery cost projections for 4 hour lithium-ion systems?

Battery cost projections for 4-hour lithium-ion systems, with values normalized relative to 2022. The high, mid, and low cost projections developed in this work are shown as bolded lines. Figure ES-2.

Is there a lithium project in Mexico?

The only advanced-stage lithium project in Mexico is Ganfeng Lithium's Sonora Lithium Clay Project, 100% held by Ganfeng through its holdings in Bacanora Lithium and Sonora Lithium.

Are battery storage costs based on long-term planning models?

Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-term planning models and other activities. This work documents the development of these projections, which are based on recent publications of storage costs.

It represents only lithium-ion batteries (LIBs)--those with nickel manganese cobalt (NMC) and lithium iron phosphate (LFP) chemistries--at this time, with LFP becoming the primary chemistry for stationary storage starting in 2021.

Average lithium ion storage price per 8MW in Mexico
