

# Average mobile ESS unit price per 100MW in Mauritius

How much electricity does Mauritius need?

Compared to 2019, the peak power demand for the Island of Mauritius decreased by 2.6% from 507 MW to 494 MW in 2020, while that of the Island of Rodrigues increased by 6.6% from 7.6 MW to 8.1 MW (Table 7). Some 2,882 GWh (248 ktoe) of electricity was generated in 2020.

How much does a Bess battery cost?

Factoring in these costs from the beginning ensures there are no unexpected expenses when the battery reaches the end of its useful life. To better understand BESS costs, it's useful to look at the cost per kilowatt-hour (kWh) stored. As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown:

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW /4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

Who compiled the statistics for Mauritius?

The statistics have been compiled in close collaboration with the Central Electricity Board (CEB), Central Water Authority (CWA), Water Resources Unit (WRU), Petroleum companies, Independent Power Producers (IPPs) and Mauritius Meteorological Services. All data refer to the Republic of Mauritius, unless stated otherwise.

What was the peak power demand for Mauritius in 2020?

The peak power demand in 2020 reached 494 MW for the Island of Mauritius and 8 MW for Rodrigues. Compared to 2019, the peak power demand for the Island of Mauritius decreased by 2.6% from 507 MW to 494 MW in 2020, while that of the Island of Rodrigues increased by 6.6% from 7.6 MW to 8.1 MW (Table 7).
