

# Average mobile ESS unit price per 20kWh in Poland

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

How much does electricity cost in Poland?

With the cost of electricity today in Poland it is 6.21 EUR cheaper to charge at the hours with the lowest price. Lighting is not the thing that uses the most electricity, but it can still be a good investment to switch to energy-efficient and LED lights. These provide up to 10x more light with the same amount of energy.

What challenges are facing Poland's electricity market?

One of the main challenges facing Poland's electricity market is balancing the need for energy security with environmental sustainability. The country's dependence on coal has significant environmental impacts, and transitioning to a greener energy mix is a complex and costly endeavor.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW /4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

What will Poland's energy landscape look like in 2025?

Jacek Zarzycki, Business Development Manager at Eaton, highlights five key areas shaping Poland's energy landscape in 2025. 1. Energy Price Caps Extended For individual consumers, the energy price cap will remain in place until September 30, 2025, limiting electricity costs to a maximum of 500 PLN/MWh (plus excise tax and VAT).
