

Average mobile ESS unit price per 500MW in Canada

How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW /4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

Why did Modo Energy Survey the battery community?

Because of this, Modo Energy surveyed the battery community - to produce this battery cost benchmark. If you finance, own, or develop battery energy storage systems, you can use this data to support procurement and sense-check financial models. To produce this benchmark, Modo Energy surveyed various market participants in Great Britain.

How many battery storage facilities are there in Alberta?

Alberta has 11 current battery storage facilities in operation, with several more in the early stages of development - read about them here. What is Utility-Scale Battery Storage?

500kW / 1MWh Microgrid Industrial Battery Energy Storage System ESS-GRID FlexiO is an air-cooled industrial/commercial battery solution in the form of a split PCS and battery cabinet with 1+N scalability, combining solar photovoltaic, ...
