

Average modular ESS container price per 200MW in Philippines

How much does a modular container house cost in the Philippines?

For a more accurate estimate, consider reaching out to us. On average, modular container houses in the Philippines can cost anywhere from Php 19,000 to Php 35,000 per square meter. This price range is relatively affordable compared to traditional standard housing, which typically falls within the range of Php 25,000 to Php 50,000 per square meter.

How much does a prefabricated container house cost?

It is made of steel that can withstand strong winds and extreme weather conditions. This is the most affordable prefabricated container house with a price ranging from 190,000PHP to 220,000PHP. Price fluctuations within this range can be attributed to factors such as the choice of materials, overall quality, column thickness, and flooring options.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW /4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

Are container van houses eco-friendly?

Container van houses, or shipping container homes, are gaining popularity in the Philippines as eco-friendly housing solutions. These innovative homes repurpose shipping containers to offer affordable and sustainable living spaces.

AZE's 20Ft or 40Ft ESS container solution gives the flexibilities for customer to deploy the system nearly in any nodes in the grid, supporting the services such as emergency power, new energy stabilizer, energy shifting, load shaving, grid ...
