

Average off grid battery system price per 5kWh in Philippines

How much does a 5kw Solar System cost in the Philippines?

Installation fees usually range from PHP 50,000 to PHP 100,000, depending on the complexity of the installation. Permits and inspection fees can cost around PHP 10,000 to PHP 20,000. Considering all these factors, the total cost of a 5kW solar system in the Philippines can range from PHP 300,000 to PHP 500,000.

What is a 5kw Solar System?

A 5kW solar system consists of solar panels, an inverter, mounting structures, and other components that work together to convert sunlight into electricity. This system can generate around 20-25 kWh of electricity per day, depending on sunlight conditions. The primary component of any solar system is the solar panels.

How long does a 5kw Solar System last?

The return on investment (ROI) for a solar system depends on the initial cost, electricity savings, and any available incentives. Typically, a 5kW solar system can pay for itself in 5 to 7 years. Besides financial savings, a 5kW solar system also reduces your carbon footprint, contributing to a cleaner and greener environment.
