

Average off grid solar storage price per 10MW in Switzerland

How much does a solar system cost in Switzerland?

A normal solar power system for an average single-family home in Switzerland costs around CHF 15,000 after subsidies and tax savings. The higher the self-consumption and the proportion of solar energy produced in the total energy requirements, the faster the solar system pays for itself.

Is solar power cheaper than a public grid?

Solar power from your own roof is cheaper than power from the public grid. You can permanently reduce your electricity costs by 30%. With your own solar system, you become self-sufficient and are less affected when electricity price increases. They generate income by feeding solar power into the grid.

Should you invest in a solar system?

The investment costs can also be deducted from taxes in most cantons. Solar power from your own roof is cheaper than power from the public grid. You can permanently reduce your electricity costs by 30%. With your own solar system, you become self-sufficient and are less affected when electricity price increases.

How long does a solar system last?

Solar systems combined with high self-consumption often pay for themselves after 15 to 20 years. Our Solar Calculator analyzes the profitability of a PV system for you. If the roof is suitable for a photovoltaic system, the question often arises: Is the investment worth it?
