

Average office building energy storage price per 150MW in Ethiopia

Can Ethiopia supply a larger economy than today?

Ethiopia could supply a much larger economy than today in the AC, using only twice the energy, were it to diversify its energy mix and implement efficiency standards. In the AC, this diversification comes about as a result of a substantial expansion of geothermal energy along with increased use of oil within industry and for cooking. IEA.

Can Ethiopia build energy efficient agro-industrial facilities?

In order to plan, design and build energy efficient agro-industrial facilities, the Ethiopian government needs competence-building and assistance from foreign experts because this would probably not be available locally. Building the facilities would also require import of high-quality equipment, which might become economically challenging.

How to promote energy efficient appliances in Ethiopia?

Energy efficiency standards and labelling. One of the major barriers when it comes to promoting energy efficient appliances on the Ethiopian market is low awareness and a large informal market, where products are traded without the buyer being able to choose products based on the energy efficiency.

How much does electricity cost in Ethiopia?

Such a mechanism is in line with the tariff guidelines and can be linked to or combined with the four-year tariff adjustment plan. Hydropower costs range from 3-5 cents per kWh, and wind and solar costs are between 5-7 cents per kWh. These cost structures align with Ethiopia's export tariffs to Kenya, which are priced at USD 6.5 cents per kWh.

What is the outlook for energy policy in Ethiopia?

The outlook is meant as a review of the current energy policy. The purpose is not to give detailed recommendations - but more to give a solid foundation for a discussion of key issues within energy policy. In the current outlook, also Ethiopian Electric Utility (EEU) and Petroleum & Energy Authority (PEA) are participating.

How can the outlook contribute to the development of Ethiopian energy sector?

The Outlook has been developed in close cooperation with all partners with strong commitment, openness and good discussions. It is the ambition that the Outlook in the same way can contribute to the development of the Ethiopian energy sector. 1. Executive Summary
