

Average office building energy storage price per 250MW in Ireland

Can energy storage save money in Ireland?

By contributing to security of supply, helping to support renewable capacity, and displacing fossil fuels in the balancing market, energy storage can deliver a net saving to end consumers in Ireland of up to EUR85m per year.

What is the energy demand for commercial buildings in Ireland?

Figure 25 shows the primary and final energy demand of the commercial buildings sector in Ireland by fuel and building activity. Modelling suggests that primary energy demand in the commercial buildings sector is around 18 TWh (~9 TWh in final energy). Among all sectors, Retail has the highest energy demand, at around 7 TWh.

Which data source is used for building activity types in Ireland?

The building activity types suggested by these studies were compared with the main data source available on commercial buildings in Ireland, namely the non-domestic building energy rating (ND-BER) database.

How do electricity rates affect Ireland's economy?

The impact of electricity rates extends beyond economics, playing a crucial role in Ireland's transition to a low-carbon economy and shaping the country's energy landscape. Fuel prices, such as gas, coal, and oil, significantly impact wholesale business electricity prices.

How much electricity does a non-residential building use in 2022?

The mean electricity consumption in 2022 for non-residential buildings built during 2005-2022 was 119 kWh/m² (See Table 5C). The Central Statistics Office (CSO) has today (20 July 2023) published Non-Domestic Electricity Consumption by Building Energy Ratings 2022.

What are energy storage technologies?

Informing the viable application of electricity storage technologies, including batteries and pumped hydro storage, with the latest data and analysis on costs and performance. Energy storage technologies store energy either as electricity or heat/cold, so it can be used at a later time.

Warehouse and storage, office, and service buildings together accounted for almost one-half (48%) of all commercial buildings. Warehouse and storage, office, and education buildings accounted for one-half of total commercial building ...
