

## Average on grid solar storage price per 30MW in Spain

Is combining solar and storage a good idea in Spain?

This variability, combined with Spain's excellent solar resources, make the economics of combining solar with storage increasingly favorable. The market for utility-scale batteries has been almost non-existent until recently as the market has lacked a clear policy and regulatory framework.

Is solar energy a renewable resource in Spain?

Although wind is currently the most used renewable resource in the Mediterranean country, solar energy is growing at a very fast pace. In fact, the solar capacity installed has more than quintupled in the last five years. In 2023, Spain was the sixth country worldwide in terms of new capacity additions.

Will Spain achieve 20GW of storage by 2030?

In addition, Spain has developed a national storage roadmap that includes a target to achieve 20GW of storage by 2030. However, current levels of customer-sited storage adoption already exceed its 2030 targets.<sup>37</sup> To date, neither has been sufficiently attractive to mobilize investments at scale.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

How much does a grid connection cost?

The complexity of grid connection requirements varies significantly based on location and local regulations, with costs ranging from EUR50,000 to EUR200,000 per MW of capacity. System integration expenses cover the sophisticated control systems, energy management software, and monitoring equipment essential for optimal battery performance.

How much does solar PV cost compared to wind?

Solar PV's advantage compared to wind is clear with an average captured price - for the entire mainland Spanish fleet - of 47.8 EUR/MWh (+3.9% compared to the average day-ahead prices) against 41.8 EUR/MWh (-9.3%) throughout the 2014-2017 period. Wind: Castilian Carnage Strong differences can be observed between the most equipped ACs.

5 &#0183; Electricity market in Spain Energy sources in Spain Spain's energy sector is characterized by a significant shift towards renewable energy sources. The country has made substantial investments in wind and solar power, which ...
