

Average photovoltaic ESS price per 20kW in Germany

Are solar photovoltaics a good investment in Germany?

Solar photovoltaic systems could be a significant contributor, though their success also relies on long-term weather conditions. Discover all statistics and data on Solar photovoltaics in Germany now on [statista.com](https://www.statista.com)!

How much does a rooftop PV system cost in Germany?

From pv magazine Germany The average system price for rooftop PV systems in German single-family homes with and without battery storage rose by around 10% to EUR1,557 (\$1,711)/kW in the second quarter of 2023, in comparison with the first quarter of the year. The prices are 21.9% higher than the second quarter of 2022 when they stood at EUR1,277/kW.

What percentage of electricity is generated by photovoltaics in Germany?

With an electricity generation of 72.6 TWh in 2024, photovoltaics covered nearly 14 per-cent of gross electricity consumption [AGEE] in Germany (Figure 3). All renewable energies (RE) together came to 53 percent. Figure 3: Development of the share of renewable energies in gross electricity consumption in Germany [ISE4], Status 12.03.2025 [AGEE].

How much will PV electricity cost in 2025?

Since the abolishment of the EEG levy in mid-2022, the electricity price does not include any components for the remuneration of PV electricity. A sample household with an annual consumption of 3,500 kilowatt hours will pay an average gross electricity price of 39.8 ct/kWh in 2025, including base price [BDEW1].

How much does PV electricity cost?

New MW-sized power plants produce PV electricity at costs of approx. 4-7 ct/kWh. For small rooftop plants the costs range from 6-14 ct/kWh [ISE1]. These cost estimates always assume that the volatile electricity is completely purchased. Over the long term, further decreases in the LCOE can be expected.

How will rising freight costs affect PV production in Germany?

In the long term, falling manufacturing costs of PV modules on the one hand and rising freight costs and long freight times on the other will improve the competitive position for module production in Germany. 10 What funding is being directed to PV research?
