

# Average photovoltaic ESS price per 30kW in Switzerland

Does Switzerland have a PV system?

There are no specific utility-scale measures in place in Switzerland. Public buildings are often considered for PV installations. It is mainly because law or recommendation mentions that public authorities have to put themselves in the spotlight and show the example. There isn't any specific subsidy for low-income electricity consumers.

What are the applications of PV in Switzerland?

Applications of PV in Switzerland are primarily roof-top grid-connected PV systems. Off-grid, ground-mounted, VIPV applications are still very scarce while an increasing number of building integrated and facade PV projects can be observed.

What is the PV potential on a Swiss roof?

The Swiss Federal Office of Energy announced in September 2018 that the PV potential on the Swiss roof was about 50 TWh. The evaluation is based on the national maps for PV roofs () and selecting the most suitable roofs. The tool is online for all of Switzerland and is translated into English.

How much support does SFOE provide for Photovoltaics Research in Switzerland?

On average, the volume of the SFOE programme support (including pilot and demonstration) is in the order of 10% of the total public support for photovoltaics research in Switzerland, which is in the order of 36 MCHF per year (including roughly 30% from European projects) (<https://pv.energyresearch.ch/projects>).

Is there a tendering scheme for PV systems in Switzerland?

There are no tendering schemes for PV systems in Switzerland. There are, however, several auction platforms for selling/buying green certificates (guarantee of origin). The price for those certificates has constantly dropped over the past years. There are no specific utility-scale measures in place in Switzerland.

How big is the PV and solar thermal market?

The data is based on a survey amongst 307 companies active in the PV and solar thermal market. About 95% of installers, importers/distributors and manufacturers are estimated to be covered in this annual market survey. The added PV capacity in 2020 reaches 475 MWp, representing an increase of close to 50% compared to 2019 with 325 MWp.

Based on this solar panel output equation, we will explain how you can calculate how many kWh per day your solar panel will generate. We will also calculate how many kWh per year do solar panels generate and how much does that save ...
