

Average portable ESS system price per 5MW in Poland

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How will Polish energy sector evolve in 2025?

Innovation in the wind power and energy storage sector is expected to increase in 2025. The "Moja Elektrownia Wiatrowa" program plays an important role in the modernization of the Polish energy sector. It supports the development of energy storage, improves energy efficiency and increases the share of RES in the country's energy mix.

How will Poland improve its energy security?

To improve the stability of the Polish electricity grid. Increasing the country's energy security. It is planned to connect storage facilities with a capacity of 2500 MW and 5000 MWh. The program runs from 2024-2028. Funding agreements will be signed until December 31, 2025. Funds will be disbursed by December 31, 2028.
