

Average residential ESS price per 1MW in China

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW /4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

How much energy storage capacity will China have by 2030?

To meet the demand from its power system, China will have to cumulate 460 GWh of energy storage capacity by 2030, among which 350 GWh shall be battery or electrochemical energy storage, and 110 GW pumped hydro storage.

How much does a 1MWh battery energy storage system cost?

For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications. There are also quantity discounts available, with the price dropping to \$434,350 for purchases of 3 - 9 units and to \$431,000 for purchases of 10 or more units.

Why is energy storage a problem in China?

Issues such as poor actual operating rates of renewable-storage integrated facilities continue to strangle the development of energy storage in China. Currently, China is still managing to refrain from fossil fuel imports, aiming to reach carbon peak and carbon neutrality by 2060.

What is the price gap between ESS and batteries?

In March, the price disparity between ESS and batteries has continued to shrink. The average price of a 280Ah/0.5C storage battery hovered around 0.38 yuan/Wh in March 2024. According to our data, the average winning price for a 2-hour ESS is approximately 0.63 yuan/Wh, resulting in a price gap of around 0.25 yuan/Wh.

How can China achieve energy self-sufficiency?

The long-term solution for China to achieve energy self-sufficiency comprises renewables reaching grid parity and sufficient energy storage capacity. Over the past decade, China has been laying the groundwork, becoming a world leader in PV, onshore wind, and lithium battery industries.
