The latest figure corresponds to 6.4% of total household expenditures.

Are German households gauging their true electricity costs?

As the energy crisis continues to dominate markets and the German government responds with comprehensive gas and electricity subsidies, gauging households' true electricity costs is a challenge that can only yield tentative results.

How does the energy transition affect electricity prices in Germany?

The energy transition's impact on household electricity prices is a contentious issue in Germany, because surcharges to finance the renewables' rollout resulted in Europe's highest bills for many years.

How much does electricity cost in Germany in 2022?

Moreover, prices for CO2 emissions allowances in the European trading system (ETS) more than tripled between 2020 and 2022, putting further pressure on electricity costs. Households in Germany on average paid 40.07 cents per kilowatt hour (kWh) in the second half of 2022, compared to 32.16 ct/kWh in the previous year.

Why are electricity prices so high in Germany?

Electricity prices in Germany are amongst the highest in Europe. There are many reasons for this, for example a relatively high share of surcharges and taxes, but also partially due to the costs arising from the promotion of renewable energy sources. However, many customers continue to support Germany's energy transition regardless.

How will Germany's electricity price change in 2020?

In 2020, grid charges will be the biggest cost driver for the electricity price. While nationwide, on average, the electricity transmission fees will increase by 6.5%, there are huge regional differences. The North of Germany will be burdened more than the south. Electricity customers must also adjust to rising taxes and duties.
